

signal head provided it does not affect its performance either electrically or optically. After the test the function was without complaint.

Dry heat EN60068-2-2 Test Bb

Class A test 60 °C for 16 h.

Result: No errors were observed. Function without complaint.

Cold EN60068-2-1

Class C test -40 °C for 16 h.

Result: No errors were observed. Function without complaint.

Change of temperature IEC 60068-2-14 est Nb

Class A test, limits -15 °C to + 60 °C, rate of change 1 °C/min, test time 16 h.

Result: No errors were observed. Function without complaint.

Damp heat cyclic IEC 60068-2-30 Test Db

Class A-C 40 °C.

Result: No errors were observed. Function without complaint.

Solar radiation IEC 60068-2-5 test Sa

Irradiance 1080 W/m², chamber temperature 40 °C 20 h.

Result: No errors were observed. Function without complaint.

Remark

Test results are only valid for the tested object.
